WORK EXPERIENCE

Supply Chain Data & Reporting Analyst McCain Foods (GB & EMENA)

OCTOBER 2023 - PRESENT

Core Responsibilities

- **Develop and own reporting solutions** across Logistics, Production Planning, Inventory, Demand Planning and Customer Service
- **Design and support S&OE & S&OP processes**, providing data insights for tactical and strategic decision-making
- **Deliver analytics support and training** to stakeholders across a multi-country region
- **Champion the region within the global business**, aligning with global initiatives and representing regional priorities
- **Deliver AI and automation solutions** to simplify processes and improve operational efficiency
- **Support senior leadership decision-making** through ad-hoc analysis and actionable insights

Key achievements

- **Transformed the Supply Chain reporting landscape**, replacing the majority of Excel-based reporting with a standardised suite of Power BI dashboards
- **Contributed to SAP S/4HANA implementation** and Databricks migration, while continuing to support ongoing Blue Yonder implementation
- **Developed a logistics network optimisation model** to identify end-to-end cost-saving opportunities, supporting a multi-million-pound supply chain optimisation project
- **Implemented regional data governance solutions**, consolidating data sources to reduce duplication and establish a consistent, trusted view of performance
- **Developed analytics capability across the region**, coaching colleagues in non-data roles on analytics and reporting, while supporting interns and graduates through mentoring and hands-on development

.....

Supply Chain Graduate, McCain Foods

OCTOBER 2022 - SEP 2023

- **Completed a cross-functional graduate programme**, gaining hands-on experience across a range of Supply Chain functions
- **Delivered projects across multiple functions**, developing a strong understanding of business processes and operational challenges
- **Discovered a passion for data and analytics**, leading to a transition into a dedicated Data & Reporting Analyst role

SPORTS AND
HOBBIES

- **Squash and tennis player;** I enjoy keeping active and trying different sports
- A self-confessed **technology geek**, always keen to explore new gadgets and technology
- **Building websites** and experimenting with ecommerce systems and digital platforms
- Enjoy **building and finding practical solutions**, with a partiucclar interest in woodworking and 3D printing
- Fascinated by **economics, financial markets, investing** and personal finance, and enjoy keeping up with current trends and developments

Operations Manager, Trickle Net Equine
Innovations

SEPT 2019 - OCT 2022

- **Managed end-to-end domestic and international operations** across ecommerce, retail, trade and wholesale, contributing to 300% business growth during my time with the company
- **Led operational and digital improvements**, implementing new logistics providers, fulfilment partnerships and business system integrations across CRM, WMS, payments and ecommerce platforms
- **Managed and analysed business finances and sales performance**, producing forecasts, budgets, cash flow and P&L analysis to inform commercial decisions

EDUCATION

MSc Logistics and Global Operations

University of Lincoln | Sept 2019 - October 2020

First-Class Honours (1st)

Focused on strategic supply chain management, logistics and global operations, with a dissertation developing an order fulfilment decision-making tool for SME.

BA Business Studies

University of Lincoln | Sept 2016 - July 2019

Upper Second-class (2:1)

Built a broad foundation across business management, commercial strategy and finance, with exposure to areas including marketing, entrepreneurship and digital business.
